## Care for your Senior Pet

In an effort to give proper care to your senior pet, the Lancaster Small Animal Hospital has developed two packages. Senior pets age much more quickly than our middle age adult pets; therefore, we recommend seeing your pet for a thorough physical examination every 6 months. A comprehensive physical examination and consultation will allow the doctor to examine your pet and discuss his or her individual care, with a special focus on challenges we face with an aging pet.

Initial senior visit:

Comprehensive Exam and Consultation	\$ 44.50
Fecal exam	\$ 21.00
Senior Wellness Package with Heartworm Test	\$ 159.50

This includes a complete blood count, advanced chemistry profile, urinalysis, heartworm exam, and thyroid monitoring. The normal value of this package with testing done separately is \$250.00 – a savings of \$45.00!

Total due at First Visit ..... \$205.00

Second senior visit (6 months later):

Senior Screening Package

This package includes a comprehensive physical examination, an electrocardiogram, blood pressure, a Schirmer tear test, and a Glaucoma Intraocular pressure test to ascertain the integrity of the eyes. The normal value of this package done separately would be \$194.00 – a savings of \$59.50!

Total due at Second Visit..... \$134.50

The doctors at the Lancaster Small Animal Hospital feel that recent advances in veterinary medicine allow us to monitor your pet's progress throughout life. We are able to detect deficiencies earlier, stop or slow down chronic progressive disease and keep your best friend functioning and happy.

*Optimum  
health care  
for your  
companion pet.*
